William G White, Jr. Family YMCA Water Fitness Class Descriptions

Aquafit-Shallow Water : This low impact exercise program is designed to give you an aerobic workout while developing your muscle tone & endurance. This program features strengthening and stretching exercises through warm-up, range of motion, flexibility, functional muscle conditioning, muscle strengthening and toning activities.

Aqua Energizers- Deep Water : Cardiovascular fitness is increased through interval workouts using adaptations of jogging, bicycling, kicking, swimming, & jumping jacks. Muscle strength & flexibility is increased through resistance exercises using kickboards, noodles, & hand weights.

Strength & Stretch- Shallow Water : This class begins to work on cardiovascular conditioning, muscle strengthening & stretching using water's natural properties of buoyancy & resistance to achieve safe & effective fitness. Each class is designed to further develop balance and coordination.

Aqua Basics- Shallow Water : Aqua Basics will simultaneously help individuals develop muscle strength and increase static balance, while increasing range of motion. Each class will help to increase muscle tone, balance and flexibility while relieving tension from injured joints.

Aqua HIIT- Shallow Water : High Impact Interval Training. This 45 minute strength-based water workout will engage your full body while protecting your joints from injuries.

Aqua Zumba – Shallow Water : We take the “work” out of workout, by mixing low-intensity and high-intensity moves for an interval-style, calorie-burning aqua dance fitness party. You’ll see why Zumba Fitness classes are often called exercise in disguise.
