WATER FITNESS CLASS DESCRIPTIONS

STRENGTH & STRETCH

This class welcomes new participants. Sometimes songs are sung as we exercise. Most of the participants are LONG-time water fitness enthusiasts & want to work out at the top of their personal goals. This class includes cardio sets, muscle strengthening & stretching using water's natural properties of buoyancy & resistance to achieve safe & effective fitness.

AQUA FIT

This is a low to medium intensity workout that takes place in the shallow end. Low impact, but great cardio workout! This is a full body workout focused on strength, toning, & balance.

AQUA HIIT

20 seconds of intense activity, then 10 seconds rest, done eight times to maximize results. Utilizing plyometrics, sprinting, and weight lifting this method of training can be extremely beneficial for power development, building muscle mass, and fat burning. You'll also build stronger joints and bones due to the increased impact on your body while protecting the joints in the water.

DEEP WATER AQUA ENERGIZERS

Cardiovascular fitness is increased through interval workouts using adaptations of jogging, bicycling, kicking, swimming, & jumping jacks. Muscle strength & flexibility is increased through resistance exercises using kickboards, noodles, & hand weights.

- All levels are welcome and moves can be adapted to the needs of each member
- Must be in at least Middle School (6th grade) or accompanied by an adult to participate
- Participants are encouraged to bring a towel, water bottle, and non-slip water shoes
- Aquatic Personal Training Sessions are available. Ask the front desk or your instructor for more details.
